SANIFECT

High Level Disinfectant

Product Description

SANIFECT is based on a new technology that kills viruses and bacteria but yet is non-toxic, alcohol free and neutral pH, making it safe for a wide range of applications methods including fogging. **SANIFECT** contains pH modifiers that neutralize ionic bonds of protein envelopes that hold hard-to-kill viruses together; and plant oil extract molecules that then penetrate to destroy the nucleic acid and dissolve the virus in seconds. This breakthrough technology is the result of years of research funded by the British Government.

3. Enclose room as much as possible and stop all mechanical ventilation
4. Ensure room is vacated during fogging
5. User should wear protective mask and clothing while fogging and until fog disperses
